

Firing in Keramiek Garage

Keramiek Garage is a shared studio where ceramicists work independently on their projects. If you throw your pieces at home but want to fire them with us, that's possible, although there are a few conditions attached.

* If you want to bisque fire with us, only bring your work when it is completely dry. We don't have enough shelf space to let your home-made pieces dry in the studio.

* If you create work outside of Keramiek Garage and want to glaze it with us, you need to purchase special credits. The cost is €25 for 2 hours.

* We have a 120L kiln with a 42 cm diameter and a 60L kiln with a 35 cm diameter. Bisque firing is done at 980°C, earthenware at 1040°C, and stoneware at 1250°C. To ensure your work is fired at the correct temperature, we ask that you bring the label of the clay/glaze used.

* The cost of firing work made outside of Keramiek Garage is €10 per kilo, per firing. After firing, your work will be weighed, and you can pay in cash or via invoice, with a 21% VAT surcharge.

* If you need to fire at a specific temperature or have a larger amount of work, you can rent an entire kiln. The cost is €75 for the 60L kiln and €100 for the 120L kiln, payable in cash or via invoice, excluding VAT.

* Firing work from our students and members takes priority.

* Please note: our kilns are not available for experimental firings.

* You can bring your work on Monday, Friday, or Saturday between 10:00 and 14:00, or on Tuesday between 18:00 and 22:00.
